2026 → 2030

STRATEGY

Three-Pillar AI Roadmap

SITUATION

The Wealth 3.0 Era

THE SHIFT

- 1.0 Portals & Access
Knowledge retrieval
- 2.0 Digital Convenience
Automation of tasks
- 3.0 **Intelligent Advisory**
Autonomous action — AI as infrastructure

WHY NOW

- **\$68T wealth transfer underway**
Millennial & Gen Z heirs are AI-native — your future clients judge you on whether you feel modern.
- **91% of next-gen HNWIs demand an "innovator"**
The absence of AI reads as obsolescence — not caution.
- **GenAI (2023) moved the paradigm**
From task automation to autonomous action — AI moved from feature to infrastructure.

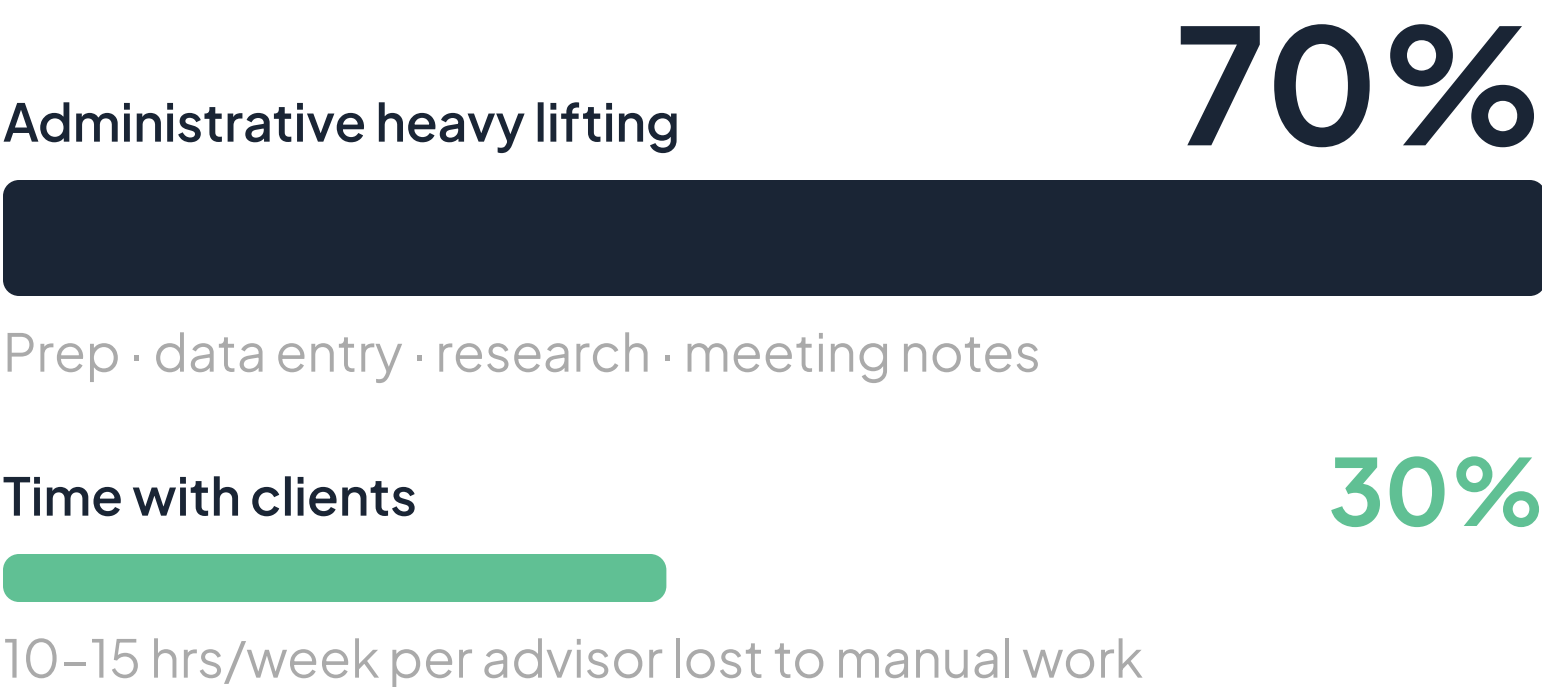

The stakes

Defensive shield against margin compression. Offensive engine to capture the largest wealth transfer in history.

COMPLICATION

The 70/30 Admin Drag

WHERE ADVISOR TIME GOES TODAY

Highest-paid people doing lowest-value work — this is margin compression on the payroll line.
